Many cases of Diphtheria and Sore Throat are prevailing at present throughout the city and country towns, and we may look for a variety of recipes and recommendations of this or that cure from the wise ones. We have such undoubted evidence that the Curative will cure Diphtheria that we strongly urge every family with young children to keep it on hand, and on the first symptoms of sore throat use it freely. The following letter from a well known citizen of Cleveland is good evidence of the virtue of Lawson's Curative for Diphtheria:

CLEVELAND, November 8, 1876.

Lonson Chemical Compleny:

GENTLENES:—The bottle of Lawson's Curative you gave me has conferred an unexpected benefit, for which you have my sincere thanks. My boy, four years old, was attacked with Diphtheria in the night, and so rapidly did the disease progress that we knew something must be done at once or we should lose him. Having nothing in the house but your Curative, which we knew to be effective in allaying inflammation, we gargled his throat and bound cloths, wet with the Curative, on the outside, and in a short time the inflammation, subsided, and our fears for his safety vanished. You are at Ilberty to refer any one to us to substantiate the above facts. Yours, etc.,

J. B. MOLYNEAUX.

After reading the above, no one who values the lives of their children, will be without a bottle of Curative in the house.
